

Testing and Certification Body Lifting equipment, safety components and machinery (HSM)

The Testing and Certification Body can look back on long years of testing activities, both in Germany and abroad. Testing is carried out by experienced technical examiners who also actively participate in the work of the standardization committees. The Testing and Certification Body offers the following services, among others:

Range of services

Testing of technical working equipment

Testing upon application and issuing of certificates

- EC-Type test certificates
- Type test certificates
- GS-Test certificates
- DGUV Test certificates
- Marking permissions for DGUV Test-mark

for the following fields of testing:

- **Lifting devices, winches and pulling equipment**
 - Lifting accessories
 - Builders hoists
 - Lifting platforms
 - Cranes and crane components
 - Lifting attachments for lifting operations
 - Access equipment, hoistable
 - Winches, lifting and pulling equipment
 - Machinery for the lifting of persons
- **Safety components**
 - Mechanical safety components
 - Electromechanical safety components
 - Electronic safety components
 - Hydraulic safety components
 - Pneumatic safety components
 - Sensor-controlled electro-sensitive equipment designed to detect the presence of persons, e.g. light barriers, ESPE, camera systems
 - Electronic/programmable safety control systems
 - Safety bus systems

- **Injection moulding machines**
 - Plastic injection moulding machines
 - Rubber injection moulding machines
- **Presses**
 - Press brakes
 - Hydraulic presses (including Annex IV no. 9)
 - Mechanical presses (including Annex IV no. 9)
 - Human-powered presses
 - Pneumatic presses
 - Automatic presses
- **Forging machines**
- **Tools, hand-guided**
 - Hand-held tools
- **Machines for the production of bolts, screws, rivets and similar moulded parts**
 - Cold forming machines
 - Packaging machines
 - Processing machines, cutting
 - Processing machines, non-cutting
 - Hot moulding machines
- **Machines for the working and processing of wire**
 - Machines for the working of wire
 - Machines for the processing of wire
