

## Third Conference »Safe and Healthy University«

New technologies in research and teaching: Promoter of a New Prevention Culture?

16<sup>th</sup> to 18<sup>th</sup> September 2013,  
DGUV Akademie Dresden

What influence do new technologies have on life at universities and research institutes? How do they change learning, teaching and research? What opportunities arise for prevention culture at universities?

Our event aims to provide participants with a forum in which they can discuss these and other questions, learn new things and enable others to share their own practical experiences.

The conference is aimed at all those active in universities and research institutes: decision makers in the fields of research, teaching and administration, health and safety officers and occupational physicians, experts in health promotion, staff and works

councils, students and prevention experts of statutory accident insurance institutions.

The 3<sup>rd</sup> university conference is a common event of the Institute for Work and Health (IAG), the Safety and Health unit (SiGe), the subject group Universities, Research Institutes of the specialist field Educational Establishments of the DGUV and the European Network Education and Training in Occupational Safety and Health (ENETOSH).

All plenary contributions will be simultaneously translated into English/German.

**1<sup>st</sup> day · Monday, 16<sup>th</sup> September 2013**

from 12:00 a.m.	Registration and Snacks
1:00 p.m.	<b>Welcome and Opening</b> Thomas Kohstall <i>Institute for Work and Health (IAG)</i>
