

<b>3</b>	<b>Sample No:</b>	
<b>3.1</b>	<b>Substance name</b>	
<b>3.2</b>	<b>Processing method</b> More detailed information on the processing method generating the dust.	
<b>3.3</b>	<b>Trade name, if applicable</b>	
<b>3.4</b>	<b>Manufacturer/supplier, if applicable</b>	
<b>3.5</b>	<b>Material data</b> Composition For example: individual components of mixtures	
<b>3.6</b>	<b>Known properties</b> For example: toxicity, toxic combustion products (the material safety data sheet is appended if available)  Carcinogenic substances of category 1A & 1B (H350, H350i) are excluded from the testing.  In the case of acute toxicity category 1 & 2 (H300, H310, H330) tests can be carried out provided that the mass fraction does not exceed 7%.  In the case of acute toxicity category 3 (H301, H311, H331), tests can be carried out provided the mass fraction does not exceed 25%.	
<b>3.7</b>	<b>Sampling point</b> For example: collector, pipe, grinder, etc. (photographs appended if applicable)	
<b>3.8</b>	<b>Name of the person who took the sample</b>
